

SCRUBFRESH™

NAIL SURFACE CLEANSER

WHAT IT IS

A natural-nail surface cleanser and temporary dehydrator.

WHAT IT DOES

- Cleanses and temporarily dehydrates the nail plate.
- Removes nail polish.

WHY YOU NEED IT

- To prep nail at each and every nail service.
- Improves enhancement adhesion and reduces lifting.
- Removes contaminants from the natural nail plate.
- Prolongs the wearability of nail coating.

FEATURED INGREDIENTS & BENEFITS

Acetone:

Quickly evaporating solvent that removes oil, moisture and contaminants from the nail surface.

Isopropyl Alcohol:

Solvent used to blend all ingredients, and serve as a skin cleanser.

Butyl Acetate:

Solvent used to blend all ingredients.

DIRECTIONS FOR USE

- Saturate a plastic-backed pad with **SCRUBFRESH™** and scrub the entire nail plate using firm pressure, paying special attention to the cuticle area and sidewalls.
- Apply to one hand, let dry and apply nail coating; follow with the other hand.
- Always use before primer (when applying enhancements).

CND offers comprehensive education opportunities. Check the education section of cnd.com for a course near you.

CREATIVE SUGGESTIONS

- Use on natural nails prior to nail coating application to help prolong the wearability of nail coatings.
- Avoid use on nail tips.

INGREDIENT LISTING

Acetone, Isopropyl Alcohol, Butyl Acetate, CI 42090 (Blue 1).
