

VORTEX

DUST COLLECTOR

CLEANING INSTRUCTIONS

1. After each client - Spray disinfectant on a paper towel and wipe off the grate and Vortex surface.

2. After every 3rd treatment - Remove grate and filter, empty filter by brushing it off.

3. After full day of use - Wipe surface and grate down with damp towel to remove dust. If needed, wash the grate, take the filter off and set aside to dry, before using again.

4. When needed - In case of product spill on grate or white casing use Nail Surface Cleanser, or Nail Product Remover to remove spill from surface.

NOTE:

1. Do not submerge your Vortex Unit in any type of liquid.
2. Do not spray liquids straight onto the Vortex Unit.
